

What is claimed is:

1. A pet care system comprising;

5 a slender display board having a front face and a rear face,

a display graphic being permanently affixed to at least the front face of the display board,

10 a hanger being at least attached to the rear face of the display board wherein the hanger can be used to attach the display board to a substantially vertical surface,

a graphic instrument used to deposit erasable marks to at least the front face of the display board,

15 a graphic instrument receptacle attached to the display board wherein the graphic instrument can be removably attached,

20 an eraser element wherein the eraser eradicates the erasable marks deposited by the graphic instrument; and,

25 a plurality of shaped display members having at least a first side and a second side wherein the second side is adapted to be removably affixed to the display board's front face, wherein the shaped members are removably affixed in a position on the display board, each shaped display member able to be removably affixed in any position on the board a plurality of times.

2. The pet care system of claim 1 wherein the display graphics shows at least "A.M" and "P.M."

30 3. The pet care system of claim 1 wherein the display graphics shows at least "A.M" and "P.M." and days of the week.

4. The pet care system of claim 1 wherein the display graphic is a predetermined color.
5. The pet care system of claim 1 wherein the display board is a predetermined color.
6. The pet care system of claim 1 wherein the graphic instrument receptacle is a, a clasp, a clip, a hook, a hanger, a suction cup, a magnet or the like.
- 5 7. The pet care system of claim 1 wherein the hanger is a clasp, a clip, a hook, a hanger, a suction cup, a magnet or the like.
8. The pet care system of claim 1 wherein the shaped member's second side being removably affixed is a, a clasp, a clip, a hook, a hanger, a suction cup, a magnet or the like..
9. The pet care system of claim 1 wherein the graphic instrument is tethered to the display board.
- 10 10. The pet care system of claim 1 wherein the display board is housed in a frame.
11. The pet care system of claim 1 wherein the erasure is tethered to the display board.
12. The pet care system of claim 1 wherein the shaped display member has an image of a pet deposited thereto.
- 15 13. The pet care system of claim 1 wherein the shaped display member is in the shape of a dog.
14. The pet care system of claim 1 wherein the shaped display member is in the shape of a cat.
15. The pet care system of claim 1 wherein the shaped display member is in the shape of a bird.
- 20 16. The pet care system of claim 1 wherein the shaped display member is in the shape of a fire hydrant.
17. The pet care system of claim 1 wherein the shaped display member is in the shape of a dog bone.
- 25 18. The pet care system of claim 1 wherein the shaped display member is in the shape of a heart.
19. The pet care system of claim 1 wherein the shaped display member is in the shape of a medication pill container.
20. The pet care system of claim 1 wherein the shaped display member is in the shape of a fish.

21. The pet care system of claim 1 wherein the shaped display member is in the shape of a pet food dish.
22. The pet care system of claim 1 wherein the shaped display member is in the shape of a syringe
- 5 23. The pet care system of claim 1 wherein the shaped display member is in the shape of a cat running into a building.
24. The pet care system of claim 1 wherein the shaped display member is in the shape of a dog running into a building.
- 10 25. The pet care system of claim 1 wherein the shaped display member is in the shape of a cat running out of building.
26. The pet care system of claim 1 wherein the shaped display member is in the shape of a dog running out of a building.

27. A method recording when pet care has been or needs to be complete comprising:

15        using a slender display board having a front face and a rear face, the front face having a display graphic permeably affixed thereto,

affixing the display board on a substantially vertical surface, the display board having a front face and a rear face, the rear face having a vertical surface

20        attachment means,

affixing a permanent display graphic on the display board,

25        placing at least one of a plurality of shaped display members having at least a first side and a second side wherein the second side is adapted to be removably affixed to at least the display board's front face,

performing pet care task,

30        moving the shaped display member from one removably affixed position on the display board to another removably affixed position on the display board when a

pet care task is complete or needs to be completed, wherein the shaped members are removably attached to the display board in a position on the display board,

5 removing and placing the shaped display in another position as pet care tasks are completed or needs to be completed, each shaped display representing a performed pet care task, each display shape moving and placing a plurality of times to display pet care tasks,

10 marking on the board using a graphic instrument making temporary markings; and,

erasing the temporary markings using an eraser.
